

April 13, 2020

Dear SCHB Member,

You are invited to an EVENING telecon discussion on Wednesday 15 April 2020 from 8pm-9pm ET facilitated by SCHB past speaker, Rob Scherer, on **Cybersecurity When Working Remote 2020**.

**Please join us on Wednesday April 15, 2020 at 8PM ET for this important CYBER SECURITY discussion.** Please [RSVP](#) if you plan to attend. This is our third weekly edition of members-helping-members to navigate issues that impact *and* concerns *related to* small chemical businesses during COVID-19.

Do you have experience with or are you knowledgeable on a small chemical business topic? If yes, please consider being our SCHB member facilitator for our members-helping-members discussion next week. We'll pair you with a member of the SCHB Executive Committee who can assist with telecon setup, introductions and note taking during the call so you can focus on leading the discussion. You can choose the day/time. [Suggest a topic](#) and availability and we'll get you scheduled.

---

**15 April 2020 Telecon DISCUSSION 8PM-9pm ET: Cybersecurity When Working Remote 2020**

**WHAT YOU'LL LEARN:**

- Working remotely during extended shutdown and shelter in place is much more than checking your email in the evening from home.
- You must carry out all your operations from a system not designed for robust commercial applications.
- Advance preparation for contingencies is the best, but if you need to catch up, this SCHB

"discuss business" call will help you get back on track and maintain a secure IT system for your organization.

Please RSVP above or email [pr@acs-schb.org](mailto:pr@acs-schb.org) and the accompanying slide-deck presentation and dial-in instructions will be emailed to you on Wednesday afternoon.
