

- Gain access to members-only portions of the ACS web site, with valuable information and powerful services to advance your career and your interests.
- Invest in the future of your career by tapping ACS' exclusive employment assistance and career guidance services, including opportunities to interview with prospective employers at the national meetings, and an online service that matches your confidential profile with openings tailor-made for you!
- Take advantage of optional health, term life, and disability insurance plans at low group rates, ACS credit cards with no annual fees, professional liability insurance, credit lines, a money market fund, and supplemental retirement programs.

While you can be a member of an ACS division without joining the national organization, the dividends of ACS membership are even more encompassing, rewarding, and career enhancing. So join ACS today and gain a national focus on the science, business, and golden opportunities in chemistry!

AMERICAN CHEMICAL SOCIETY

The advantages of being a member of the Division of Small Chemical Businesses

Without a doubt, small chemical enterprises (and their employees) face a unique set of challenges and problems. It is to address these needs, and to aid in the formation, development, and growth of small chemical businesses, that the American Chemical Society's Division of Small Chemical Businesses was founded in 1978.

The primary objective of the Division is to help self-employed chemists and chemists working in small enterprises with the legal, social, educational, legislative, regulatory, and economic aspects of their unique professional status. By serving as a clearing-house of information, a forum for discussion among colleagues, and a liaison between small chemical businesses and chemistry students seeking employment, the Division works on a number of fronts to encourage and promote the development of free enterprise and entrepreneurship in chemistry-related industries.

Just one important contact, one timely bit of strategic information, or one advance warning of an upcoming regulation will make your membership in the Division of Small Chemical Businesses invaluable. Join today and find out how powerful it can be to be piped into the small business network!

Visit our web site at

To join the American Chemical Society and the Division of Small Chemical Businesses, go to
www.acs.org/membership

Or telephone 1-800-333-9511
for information only

There are many compelling reasons to join the American Chemical Society's Division of Small Chemical Businesses

Networking opportunities

- Meet your ACS colleagues in program sessions and social hours at national meetings and local Division gatherings
- Influence technical programming and/ or present papers at national meetings and increase your exposure to important business knowledge
- Rent a discounted booth from SCHB in the Expo Small Business Row: a national advertising opportunity for a low cost.

Opportunities to keep you on the cutting edge

- National programming on True Stories, relating experiences of our members, tutorials and sessions such as invention, funding, environment, patents, manufacturing, business, negotiation
- Small Chem Biz Newsletter alerts you to the latest with start-ups, financing, marketing, product development, safety, environmental and legal issues
- Free business card ad in newsletter for meeting presentation
- A constantly updated web site with abstracts, presentations, and information on upcoming meetings
- Free business listing on the Member Links section of our web page

Member discounts

- Discounts on meeting abstract books
- Discount on Oxford University ACS publications

Connect with chemistry
colleagues nationwide in
all disciplines — And
get even more exciting benefits!

More than 159,000 chemists and scientists in allied fields throughout the world consider membership in the American Chemical Society (ACS) to be a critical, high-yield investment in their work and careers. That's because ACS programs, publications, and activities continue a tradition of excellence in meeting members' needs dating back to the Society's founding in 1876.

Here are just a few ways ACS membership can be an integral, vital part of your professional development:

- Stay informed of all breaking news in the science, business, and technology of the chemical world with your weekly subscription to Chemical & Engineering News.
- Save money on subscriptions to ACS journals (discounts up to 81%!) ... reduced registration fees for ACS meetings, short courses, and other continuing education programs and products ... and a special low price for the online, fully searchable version of Chemical & Engineering News, loaded days before most receive the print version.
- Network with colleagues and keep current in your specialty through membership in the Division of your choice (**first year free as an ACS member**) and participation in one of 188 ACS local sections. Twice-yearly national meetings also provide excellent occasions for the exchange of ideas and the exploration of new partnerships.
